

Applied Anthropology

ARCHAEOLOGICAL - BIOLOGICAL - CULTURAL - MEDICAL

Department of Anthropology Graduate Program in Applied Anthropology

Biological Track: M.A. and Ph.D. degrees

At the M.A. level, the Biological Track offers focused training in methods and theories of applied biological anthropology, preparing students for careers in government and non-governmental agencies, community-based organizations, and medical fields. At the doctoral level, students receive more advanced training and research experience, and will be prepared for both academic and practicing positions. Students in both M.A. and Ph.D. programs may opt to simultaneously pursue a concentration in Archaeological and Forensic Sciences or Biocultural Medical Anthropology by choosing elective courses from an approved list.

Biological Anthropology Faculty

Lorena Madrigal (human demography and biology, genetics, Costa Rica), David Himmelgreen (nutritional anthropology, growth and development, HIV/AIDS, Southern Africa, Costa Rica, Tampa), Erin Kimmerle (forensic anthropology, demography, Bosnia, Nigeria), Elizabeth M Miller (human biology, immune function, maternal and infant health, nutrition, life history theory, evolutionary ecology, field and laboratory methods, East Africa)

Application Deadline:

Dec. 15, for Fall Admission only
